**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 7 is rejected under 35 U.S.C. 102(b) as being anticipated by Okamoto (6748770).

Okamoto (6748770) teaches the garment as claimed including a body (3) comprising a cylindrical knitted fabric; and both the sleeves (5) each comprising a cylindrical knitted fabric, wherein the body and both the sleeves are joined on sides by knitting operation without sewing, and a front body and a back body of the body are joined at shoulders, on a flat knitting machine having at least a pair of front and back needle beds, and wherein front portions of both the sleeves are joined to the front body at underarm positions using gores (see col. 3-col. 4) such that knitting widths of front sleeves of the sleeves becomes narrower than knitting widths of back sleeves of the sleeves above the underarm positions, the front portions of both the sleeves are joined to the front body at the underarm positions using the gores such that a knitting width of the front body becomes narrower than a knitting width of the back body above the underarm positions, and the front body and the back body are joined to both the sleeves by overlapping knit stitches without any twist on sides. The method of making is not germane to the patentability of the product itself since specific structure does not result from such method steps other than which is set forth in Okamoto.

*Allowable Subject Matter*

Claims 5, 6 and 7 are allowed.

*Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
